

A ATLANTIC

MOTORYACHTS

The Atlantic 42 is a motor yacht par excellence not only in technical terms. For her, the designer, John Bennett, developed a modern and yet timeless design which effectively emphasizes the vessel's sporting ambitions. The exemplary design takes into account the practical demands placed on the craft, so ease of handling is always the top priority.

The Atlantic 50 meets your personal requirements of superyacht interior design. There are countless options for the interior layout. You could choose for a spacious saloon with a magnificent view to the surrounding where your Atlantic 50 has taken you. Another possibility is raising the dinette to a higher level and make a third cabin possible.

Atlantic Quality. Each Atlantic yacht built in our boatyard is subject to stringent quality monitoring, from the laying of the keel to the tightening of the last screw. This is reassuring because it means you depend fully on your vessel in each and every situation. Place your trust in a boatyard that is geared to meet your exact requirements.

Atlantic Motoryachts are built to satisfy the personal taste of the owners. From the Atlantic 460 to the prestigious Atlantic 56HT, the interior is completely custom build.

With Custom Quality Build we mean as much as: "You can design the complete interior of your own version of the Atlantic Motoryacht of your choice. We build it, if technically possible!". With our interior designers we will discuss your wishes, from Lay-out to styling, and find your exact demands. Our meaning of Custom Quality Build is: 'Exceeding what the client expects'. Our team closely monitors the quality in every detail, whether that be technical finish or performance, to ensure the full satisfaction of the owner.

Normally, when you build your yacht, it means a lot of travelling to the yard, to manage the building process. It has been costly in time and money and no regrets, when the building process has gone further on. Now has Atlantic Motor Yachts and Vripak made it possible to design and manage your yacht building from your own home or office. They had made the New Build – Go To – concept. This is totally new thinking of being in charge for the building of your Dream Yacht.
